Best In Class

LeeBoy

Legendary Screed Performance

LeeBoy Legend Screed System

Our popular Legend Screed, standard on the 1000D, comes with two propane burners on the main screed and one burner on each extension. The wear plate is made of 3/8 inch AR 400 steel, a special long-wearing hardened material that is bolted-on for easy replacement. The hydraulic screed extensions, unique to the LeeBoy Legend Screed System, are mounted in front of the main screed and are easily adjustable resulting in a seamless mat at paving widths up to 13 feet.

Hydraulic Hopper Controls

Hopper and Wings

The newly designed hopper on the 1000D can be raised higher than any paver in its class allowing for better paving on steeper grades. The hopper wings, which open to 9 feet and fold to a compact 8 1/2 feet, are hydraulically controlled from the operator's position to move material off the wings and into the hopper. One lever controls raising and lowering of the hopper and folds the wings. The new hardboard rubber guards on the front of the hopper are longer lasting and prevent spillage. The compact size of the hopper allows easy loading directly onto a trailer.

Efficient Drive System

The 1000D may be configured with tracks or rubber tires. The track version has single-speed dual motors connected directly to torque hubs which eliminates chains and adjustments. Undercarriage maintenance is reduced with the addition of two automatically adjusting track tension cylinders. The rubber tire version has two-speed transmission.

LeeBoy Quality, Reliability and Product Support

We understand how important our products are to your business. Quality, reliability and product support are our top priority. LeeBoy products are manufactured and designed by paving experts using the finest components and the highest quality workmanship. Independent LeeBoy Dealers provide great sales, service and parts support worldwide. LeeBoy Sales Representatives, with more than 500 combined years of paving experience, support our Dealers and you by providing on-site start-up training to every customer who buys a 1000 Series Paver. Genuine LeeBoy parts are available for all LeeBoy products for fifteen years from the initial service date. LeeBoy products are made with the paving professional in mind.

Electronic Controls

LeeBoy 1000 Series Paver controls have been consolidated into a single switch and access box, putting controls at the operator's fingertips.

A pause/resume function stops paver creeping, helping the operator to maintain a smooth mat.

The LeeBoy 1000 Series Pavers may also be equipped with a full line of automatic grade controls:

- Single Electronic Grade (Joint Matchers)
- Dual Electronic Grade
- Grade and Slope

The Joint Matcher automatically matches joints whether it is multiple passes on a parking lot or a two-lane street or road. The Dual Grade Controls automatically maintain a set depth on both ends of the screed. The Grade and Slope Controls maintain a set depth on one end of the screed and a set slope to the other end of the screed.

Choose the Laser Tracking Control when you need to pave large areas such as a parking lot

or tennis court. Used with a rotating laser, sold separately, the Laser Tracker can follow a plane of laser light to create perfectly flat paved surfaces or a precise sloping surface for water draining/run-off purposes.

Configuration Checklist

| | 1000D |
|---|--------------|
| 12 Month Warranty | ✓ |
| 37 HP Hatz Diesel Engine | ✓ |
| 8 to 13 Feet Legend Screed System | ✓ |
| Under Auger Cut-Off Gates | ✓ |
| Night Operating Light Package | Optional |
| Sonic Auger Controls | Optional |
| Single Electronic Grade (Joint Matcher) | Optional |
| Dual Electronic Grade | Optional |
| Grade and Slope | Optional |
| Laser Tracker Controls | Optional |
| Truck Hitch | Optional |
